Deploy and Manage Citrix ADC 13 with Citrix Gateway

ORDER FULL VERSION

<https://killexams.com/pass4sure/exam-detail/1Y0-231>

Question: 157

Which scenario will cause automatic high availability (HA) synchronization to fail?

- A. Different build versions
- B. A configuration change to the primary Citrix ADC
- C. A forced failover
- D. Manually forced synchronization

Answer: A,C,D

Explanation:

Reference: <https://support.citrix.com/article/CTX124439>

Question: 158

Which authentication type can a Citrix Administrator use to enable Citrix ADC authentication, authorization, and auditing (AAA) dual-factor authentication from a user's mobile device app?

- A. LDAP
- B. LOCAL
- C. SAML
- D. RADIUS

Answer: A

Explanation:

Reference: <https://docs.citrix.com/en-us/citrix-adc/current-release/system/authentication-and-authorization-for-system-user/two-factor-authentication-for-system-users-and-external-users.html>

Question: 159

Scenario: To meet the security requirements of the organization, a Citrix Administrator needs to configure a Citrix Gateway virtual server with time-outs for user sessions triggered by the behaviors below:

• Inactivity for at least 15 minutes.

• No keyboard or mouse activity for at least 15 minutes

Which set of time-out settings can the administrator configure to meet the requirements?

- A. Session time-out and client idle time-out set to 15
- B. Session time-out and forced time-out set to 15
- C. Client idle time-out and forced time-out set to 15
- D. Client idle time-out and forced time-out set to 900

Answer: A

Explanation:

Reference: <https://docs.citrix.com/en-us/citrix-gateway/current-release/vpn-user-config/configure-pluginconnections/configure-time-out-settings.html>

Question: 160

Scenario: A Citrix Administrator needs to test a SAML authentication deployment to be used by internal users while accessing several externally hosted applications. During testing, the administrator notices that after successfully accessing any partner application, subsequent applications seem to launch without any explicit authentication request.

Which statement is true regarding the behavior described above?

- A. It is expected if the Citrix ADC appliance is the common SAML identity provider (IdP) for all partners.
- B. It is expected due to SAML authentication successfully logging on to all internal applications.
- C. It is expected if all partner organizations use a common SAML service provider (SP).
- D. It indicates the SAML authentication has failed and the next available protocol was used.

Answer: B

Question: 161

A Citrix Administrator needs to deploy a Citrix ADC between the servers and the client, with servers only allowed to reach the client through the Citrix ADC.

In which mode should the administrator deploy the Citrix ADC?

- A. Inline
- B. Direct server return
- C. Transparent
- D. One-arm

Answer: C

Question: 162

Scenario: A Citrix Administrator needs to configure an authentication workflow on Citrix ADC with the below requirements.

All internal users must use their corporate credentials to authenticate.

Users from partner organizations must be authenticated using their own directory services without replication or a synchronization process.

How can the administrator meet the above requirements while authenticating the users?

- A. Deploy SAML on Citrix ADC in the service provider (SP) role for users from partner organizations.
- B. Create two LDAP and two SAML authentication policies on the authentication, authorization, and auditing (AAA) virtual server.
- C. Configure nFactor authentication with two LDAP advanced policies and one SAML advanced policy.
- D. Configure two dedicated AAA virtual servers for internal and partner users.

Answer: C

Question: 163

Which profile can a Citrix Administrator create to configure a default profile that disables TLSv1?

- A. DTLS
- B. TCP
- C. HTTP
- D. SSL

Answer: A,D

Explanation:

Reference: <https://docs.citrix.com/en-us/citrix-adc/current-release/ssl/ssl-profiles/secure-front-end-profile.html>

Question: 164

Scenario: A Citrix Administrator needs to integrate LDAP for Citrix ADC system administration using current Active Directory (AD) groups. The administrator created the group on the Citrix ADC, exactly matching the group name in LDAP.

What can the administrator bind to specify the permission level and complete the LDAP configuration?

- A. Users to the group on the Citrix ADC
- B. A nested group to the new group
- C. An authentication, authorization, and auditing (AAA) action to the group
- D. A command policy to the group

Answer: A,C,D

Explanation:

Reference: <https://support.citrix.com/article/CTX123782>

Question: 165

A Citrix Administrator needs to configure a Citrix Gateway virtual IP to allow incoming connections initiated exclusively from web browser sessions.

Which advanced policy will accomplish this?

- A. RE
- B. HTTP
- C. HEADER User-Agent NOTCONTAINS CitrixReceiver
- D. RE
- E. HTTP
- F. HEADER User-Agent CONTAINS Chrome/78.0.3904.108 Safari/537.36
- G. HTTP
- H. RE
- I. HEADER(âUser-Agentâ).CONTAINS(âMozillaâ)
- J. HTTP
- K. RE
- L. HEADER(âUser-Agentâ).CONTAINS(âCitrixReceiverâ)

Answer: A,E

Explanation:

Reference: https://stalhood2.rssing.com/chan-58610415/all_p2.html

Question: 166

The Citrix ADC SDX architecture allows instances to share _____ and _____. (Choose the two correct options to complete the sentence.)

- A. the kernel
- B. CPU
- C. memory
- D. physical interfaces

Answer: B,D

Question: 167

Scenario: A Citrix Administrator made changes to a Citrix ADC, deleting parts of the configuration and saving some new ones. The changes caused an outage that needs to be resolved as quickly as possible. There is no Citrix ADC backup.

What does the administrator need to do to recover the configuration quickly?

- A. Restore from the revision history.
- B. Run high availability (HA) file synchronization.
- C. Restart the Citrix AD
- D. Run saved versus running configuration.

Answer: A

Question: 168

Scenario: While performing a disaster recovery test, a Citrix Administrator decides to failover the Citrix ADC high

availability (HA) pair appliances. The administrator notices that the failover is NOT working as expected, and the secondary Citrix ADC is NOT taking over as primary. The administrator suspects that networking issues may be causing the failure.

What could be the cause of this issue?

- A. HA monitoring is enabled on an interface of the secondary node that shows as ENABLED, DOWN
- B. HA monitoring is enabled on a disabled interface of the primary node.
- C. HA heartbeats are only seen on some enabled interfaces of the secondary node.
- D. The Independent Network Configuration (INC) mode is enabled on the primary node.

Answer: A

Question: 169

Scenario: A Citrix Administrator needs to create local, limited-privilege user accounts for other administrators.

The other administrators will require only:

- â The ability to enable and disable services and servers
- â Read-only access

Which built-in command policy permission level can the administrator use?

- A. Read-only
- B. Operator
- C. Sysadmin
- D. Network

Answer: B

Question: 170

What can a Citrix Administrator configure to filter IPv4 addresses?

- A. Pattern set
- B. Data set
- C. Citrix Web App Firewall
- D. URL set

Answer: C

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including Exam Questions, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Practice Exam Questions Based on Current Exam Objectives

Killexams.com provides practice exam questions aligned with the latest official exam objectives and latest syllabus. Our content is reviewed and updated regularly to reflect recent changes announced by certification vendors. By studying these practice questions, candidates will cover the structure, difficulty level, and topics of the actual exam, helping them prepare more effectively and efficiently.

Comprehensive Practice Exams (PDF Format)

Killexams.com offers multiple-choice questions (MCQs) in easy-to-read PDF format, covering all major domains of the exam. Each PDF contains a structured collection of practice questions and verified answers designed to support focused study. These MCQs help candidates reinforce key concepts, identify knowledge gaps, and improve exam readiness through consistent practice.

Realistic Practice Tests (Online Test Engine & Desktop Test Engine)

To support hands-on preparation, Killexams.com provides practice tests through both an Online Test Engine and a Desktop Test Engine. These tools are designed to simulate a real exam environment, allowing candidates to practice under exam-like conditions, with latest syllabus and topics of the exam. Performance tracking, test history, and result analysis help users evaluate their progress and focus on areas that need improvement.

Risk-Free Purchase Policy

Killexams.com follows a transparent and customer-friendly purchase policy. If users are not satisfied with the study materials, they may request assistance or a refund in accordance with our published terms and conditions. This policy reflects our commitment to customer satisfaction, fairness, and confidence in our preparation resources.

Regularly Updated Content

Our practice question bank is reviewed and updated on an ongoing basis to stay aligned with the latest exam outlines and vendor updates. This ensures candidates are studying up-to-date, relevant material, and preparing with content that reflects current exam expectations, helping them stay confident and well-prepared.
